Date: Friday 27th October 2023 | **Time:** 9:00-13:15

The use of framework agreements has increased in many member States over the last years and is now considered the most widespread centralizing technique, being the most used technique by central purchasing bodies. However, framework agreements are still not so much studied in all their implications, both from a legal and a management point of view. This workshop brings together the most experienced users of framework agreements in Europe and aims to compare their techniques and legal solutions to common problems.

Program

9:00 Walk-in with coffee/tea
